TABLE OF CONTENTS FOR
"TECHNOLOGY OF PRECISION INSTRUMENT CONSTRUCTION"

A. B. Yakhin, A. N. Malov,
A. A. Matalin, M. Ya. Kashepava

TABLE OF CONTENTS

	<u>Page</u>
Preface	3
Introduction	7
I. Machining with lathes	
1. Efficient limits for application of lathes	13
2. Turning cylindrical surfaces between the centers	14
A. Inaccuracy of centering	
B. Inaccuracy of a lathe	
C. Elastic deformations under action of cutting stresses	
D. Inaccuracy of a stock	
E. Inaccuracy of tool setting	
3. Flexure and wear of a lathe tool	20
3. Turning cylindrical surfaces in a chuck	32
A. Inaccuracy of the path of tool point	
B. Wobbling of a workpiece	
C. Deformations under cutting stresses	
D. ...

D. Precision of longitudinal dimensions	
4. Turning on mandrels	39
5. Turning on thin discs	42
6. Turning eccentric surfaces	45
7. Turning conical surfaces	49
8. Turning irregular surfaces	51
9. Boring holes	56
A. Inaccuracy caused by setting of workpiece	
B. Inaccuracy attributed to the boring process	
II. Machining by turret and automatic lathes	
1. Machining in turret lathes	65
A. Efficient limits of application	
B. Turning cylindrical surfaces	
C. Turning conical surfaces	
D. Drilling and finishing holes	
2. Machining in automatic lathes	85
A. General information	
B. Machining in automatic turret lathes	
C. Machining in automatic lathes of longitudinal type	
III. Milling plane surfaces and form milling	
1. General information	121
2. Milling plane surfaces	125
3. Milling curvilinear surfaces	133
A. Milling with master form	
B. Factors limiting milling with master form and machining accuracy	
C. Milling in semiautomatic profiling machines	
D. Reflection profiling devices	
E. Milling parts with a profile according to the Archimedean spiral

IV. Gear milling	
1. Gear milling by the profiling method	172
A. Tooth cutting in a milling machine with the aid of the dividing head	
B. Cutting the teeth in a gear-milling semiautomatic machine with the disc milling cutter	
C. Cutting the teeth with the aid of several disc milling cutters	
2. Gear milling by the generating method	210
A. Nature of the method	
B. Field of application	
C. Worm mills	
D. Gear-milling machines operated by the generating method	
E. Errors in milling the teeth by the generating method	
V. Drilling	
1. General information	268
2. Drilling with the aid of jigs	270
3. Drilling with preliminary center punching	280
4. Drilling by coordinates	287
5. Drilling with the aid of setting gages	294
VI. Cold pressing	
1. General rules	296
2. Cutting-off	297
A. Cutting-off with shears	
B. Cutting with a press	
3. Blank cutting and perforating	304
A. Blank cutting	
B. Cutting of materials	
C. Perforating	
D. Quality and precision of cutting and perforating

4. Incision, trimming and cut-through	314
5. Dressing and calibrating	316
6. Bending and straightening	321
7. Drawing	330
A. General information	
B. Calculating dimensions of blanks	
C. Determination of the number of operations	
D. Accuracy	
8. Stamping	348
9. Relief pressing	353
10. Flanging	354
11. Extrusion	358
12. Calking	360
13. Volume pressing	362
14. Combination pressing	372
A. General information	
B. Combination pressing in dies of successive action	
C. Combination pressing in dies of combined action	
15. Pressed-welded constructions	390
16. Application of cold pressing in assembling	392
17. Designing parts produced by cold pressing	395
A. Designing parts produced by cutting-out, perforating, incision and cutting-off	
B. Designing parts produced by bending in dies	
C. Designing parts produced by drawing in dies	
VII. Other methods of processing	
1. Casting	405
A. Sand casting	
B. Permanent mold casting	
C. Pressure casting	
D. Precision casting

2. Hot pressing	431
3. Special types of pressure treatment	436
A. Drawing	
B. Cold rolling	
C. Reduction	
4. Parts made of plastics	440
A. General information	
B. Methods for making the parts of plastics	
C. Precision of parts made of plastics	
D. Shaping the details made with pressing and pressure casting	
5. Making parts of metal powders (metalloceramics)	451
6. Soldering	454
7. Electric spark treatment	456
VIII. Finishing	
1. Fine turning	457
A. Nature of the process	
B. Machining conditions, tools, machines	
C. Precision, surface quality and the application field	
2. High-speed cutting of metals	461
A. History of high-speed cutting	
B. The production characteristic of high-speed cutting	
3. Finishing axle pins with hard disc	466
4. Grinding	468
A. External cylindrical grinding	
B. Centerless external grinding	
C. Internal grinding	
D. Surface grinding	
E. Grinding with discs

5. Final operations of finishing	483
A. Lapping	
B. Turning-in	
C. Manual fine finishing	
D. Mechanical fine finishing	
E. Honing	
F. Superfinishing	
G. Polishing	
IX. Surface coating and chemicothermal treatment of the surface layer	
1. Surface coating	509
A. Protective metal plating	
B. Chemical coating	
C. Lacquer-paint coating	
2. Chemicothermal treatment of the surface layer	534
A. Cementation in solid carburizing agent	
B. Gas cementation	
C. Cyaniding (liquid cementation)	
D. Nitrocementation	
E. Nitriding	
F. Aluminizing
